Good Innovative Prevention Practice +

We provide you with the programs that will give your customers confidence that you are a competent company, committed to the safety of your workforce, focused on high quality business performance.

Compliant, Competent, Coordinated.

- Establish your targets.
- Track your compliance.
- Assess your incidents.
- Review program effectiveness.

Safety through competent performance.

"Within the competency definition there is an inference that the competent person has the resources necessary to act and the authority to decide appropriate actions. Without either the resources or the relevant powers of authority competence is negated and consequently the person is in the position where a breach of his duty of care becomes a distinct possibility."

Prevention, A Universal Responsibility, McAleenan & McAleenan 2006
